

Rid your workspace of contaminants within a few hours!

Flu Season **Germs** **Viruses** **Spores** Contaminants **Mold** **Pollutants**

With dangerous contaminants polluting our air, the challenges of keeping your staff members safe, healthy, and productive can feel overwhelming!

Milhouse Engineering & Construction, Inc. can help you sanitize your office space quickly and efficiently. Maximize the productivity of your team by providing peace of mind, because you've taken precautions to help them remain free from the stress and trauma these blights can cause.

Our sanitization fogging is an all-in-one solution for the complete sanitization of any interior workspace. We use a specially-atomized solution to clean and filter the air in your space. This hospital-grade EPA-registered solution provides the following:

- » Virucide
- » Disinfectant
- » Fungicide
- » Sanitizer
- » Bactericide
- » Cleaner

Our fog has been proven to effectively combat the Coronavirus, penetrating and sanitizing the contaminants in the air and on all surfaces!

Our sanitization fogging doesn't damage electronics, stain fabrics, or harm plants.

- » Your staff can reenter the space approximately two hours after fogging is completed.
- » The only thing the fogging leaves behind is clean, sanitized air with a subtly fresh scent.
- » Save 70% on traditional cleaning costs and receive more effective sanitation.

Milhouse is a Chicago-based multidisciplinary engineering and environmental services firm. We help our clients mitigate risks, reduce costs, and improve operations in a safe and reliable manner by providing solutions that improve communities everywhere.
